Producción científica

Resumen del período 1983-2018

Se presentan las publicaciones científicas recopiladas en PubMed cuya filiación sea Universidad Favaloro u Hospital Universitario Fundación Favaloro. PubMed es un motor de búsqueda de libre acceso a la base de datos MEDLINE de citaciones y resúmenes de artículos de investigación biomédica, ofrecido por la Biblioteca Nacional de Medicina de los Estados Unidos. Desde 1983 se han publicado en el área de ciencias biomédicas 1377 artículos (no se incluyen 879 artículos publicados en revistas que no están indexadas en PubMed).

Factor de impacto

Factor de impacto (también conocido como índice de impacto), más común en idioma inglés *impact factor*, es una medida de la importancia de una publicación científica. Si bien la medida del factor de impacto tiene sus aspectos controvertidos en cuanto a la forma en que las publicaciones científicas de investigación son percibidas y evaluadas, mantiene una gran influencia en las agencias evaluadoras. Por su parte, constituye una herramienta cuantitativa que permite hacer un seguimiento objetivo de la producción de la institución.

Se presenta la evolución del factor de impacto acumulado cada año, así como el acumulado en períodos de seis años.

Artículos publicados

Detalle de la producción histórica desde 1983 en períodos anuales (2257 artículos).

Año 2018

- 1) ***Am J Transplant. 2018***
